CRC Power Lube with Ceramic

Give your equipment the power of ceramic protection.

CRC Power Lube with Ceramic delivers long-lasting lubrication and advanced protection for metal parts operating under demanding conditions. Featuring innovative ceramic technology, this high-performance lubricant forms a durable, low-friction barrier that helps reduce wear, minimize metal-to-metal contact, and extend equipment life. It delivers double the strength of typical lubricants (4,500 lbs. Falex rating) and holds strong up to 149°C. Ideal for extreme load-carrying situations, CRC Power Lube with Ceramic keeps moving parts operating smoothly, quietly, and efficiently.

Features & Benefits:

- **Advanced Ceramic Technology:** Forms a durable, low-friction lubricating barrier that helps reduce wear and extend the life of moving parts.
- **Long-Lasting Lubrication:** Provides extended performance under demanding operating conditions, helping reduce the need for frequent reapplication.
- **Excellent Wear Protection:** Helps minimize metal-to-metal contact, reducing friction and protecting components from premature wear.
- **Improves Equipment Reliability:** Helps keep machinery and mechanical systems operating smoothly, reducing downtime and supporting preventive maintenance programs.

Use On:
